-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

This is the first action relating to serial application number 10/590,103 filed 04-09-2007.

Claims 1-20 are currently pending.

#### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

#### ***Drawings***

2. The examiner has accepted the drawing filed with this application as formal drawing.

#### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-6, 11-13 and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by DE (2818170). DE (2818170) discloses a rotor block comprising a housing (1) having at least one connecting surface (see above 2 and 3) a plurality of bearing seats (5, 6) for accommodating a bearings (7, 8), as seen in fig.1, the bearing can be dismantle from the housing from the outward direction towards and the rotor can be dismantle towards a side which lies transversely with respective to the former, the bearings seats are adapted to form openings directly configured in the housing wall, without the used of annular bodies, wherein the plurality of pivot bearing

Art Unit: 3656

seats adapted to form a segment (see 18) greater than a semicircle around one of the bearing to leave a section open on one side in relating to the bearings to form a narrowing.

In claim 2, it is apparent that the narrowing (see fig. 5) has a diameter larger than the hub (10).

In claim 3, note it is apparent the bearings are smaller than the opening to allow the bearing to be accommodated in the opening.

In claim 4, note the rotor can be taken out from the free side that is directed from the open segments after the bearings are removed.

In claim 5, it is apparent that the combination and the opening and the segments will produce a cross-section that resembles a key hole.

In claim 6, note the upper region of the opening is set to accommodate a bearing.

In claims 11-13 and 18-19, DE (2818170) discloses the claimed invention above.

### ***Allowable Subject Matter***

5. Claims 7-9, 14-17 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Citation***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the prior art cited in attached PTO Form 892.
